Tandem Pitches Investors at the June 2017 Clean Innovation Investor Forum and Carbon XPRIZE Summit

June 13, 2017

NEW YORK / BOSTON / ONTARIO – Tandem today delivered its investor presentation at the June 2017 Clean Innovation Investor Forum and Carbon XPRIZE Summit. Tandem is a Round Two Competitor in the NRG COSIA Carbon XPRIZE competition; <http://carbon.xprize.org/>, a \$US 20 million global competition challenging teams to develop breakthrough technologies that convert the most carbon dioxide emissions from natural gas and power plant facilities into products with the highest net value.

During a presentation titled, “Let’s Clear the Air”, Jerry Flynn, the President and CEO of Tandem, described his company’s technology as a patented gas to minerals process that is “simple, scalable and profitable”. The long term mission of Tandem is to become the market leader in industrial carbon recycling.

Tandem’s market acceleration is being driven with the support of its strategic partners; Enviro Ambient, Enviro Innovate, and a blue chip group of organizations and individuals dedicated to inspiring transformation, enabling new markets, and advancing solutions to some of our world’s grandest challenges.

About Tandem

Tandem is a CO₂ conversion technology company whose technology is focused on the conversion of greenhouse gas emissions to compounds that are used to make every day household products, such as health supplements, toothpaste, paint, and fertilizers. For more information, please visit www.tandemtechnical.com.

About Enviro Ambient

Enviro Ambient develops and commercializes clean energy solutions for manufacturers and power generators that use fossil fuels to generate energy to produce electricity, cement, aluminum, steel, oil and other industrial goods. As our suite of clean technologies increases, there will be expanded focus on solutions targeted toward recycling, renewable energy, green transportation, advanced materials, green chemistry, and water solutions. This also includes energy efficiency and production technologies that

result in lower GHG emissions. Enviro Ambient and its collaboration team, are marvelous partners of government, utilities, and energy consumers, and our advancements are vitally important in defense of this continent’s energy supply, energy security, energy sustainability and grid integrity. For more information, visit www.enviroambient.com.

About Enviro Innovate

Enviro Innovate has formed a cleantech accelerator that is attracting startups and established enterprises looking to commercialize or acquire innovative technologies. Enviro Innovate, in collaboration with Queen’s University, Air Liquide, Carbonomics, E. I. DuPont Canada Company, Foley Hoag, Kingston Process Metallurgy, McAllister & Quinn, WorleyParsons, and the City of Kingston, is able to draw on the experience and expertise of a multitude of relationships and resources to assist early-stage companies to commercialize next-generation, globally-applicable, cleantech products. We focus on a range of clean-tech solutions including: recycling, renewable energy, green transportation, advanced materials, green chemistry, and water solutions. As importantly, this focus also includes energy efficiency and production technology that results in lower GHG emissions. Initially conceived in 2013, this collaborative partnership with our partners in this innovation ecosystem is impactful and unprecedented. For more information, visit www.enviroinnovate.com.
